Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant traverses the election of species requirement on the grounds of lack of burden and failure to establish reasons therefore.

Applicant should consult MPEP 808.01(a) for a showing that these requirements are inherent in the very nature of species.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glintz in view of Waterlyn.

Glintz as best seen in Fig. 1 and described in col. 1, lines 52-68 shows a portable, foldable shower enclosure that is self supporting and provides full response to claim 1 except for the spray shower. Waterlyn teaches the expedient of a showerhead 105 for use in an identical environment. Accordingly, it would have been prima facie obvious to provide the former with the water source of the latter.

The folding methods of claims 6-9 provide no structure not shown here and are met by the foldable nature of Glintz.

Re: claim 3, the cover of Glintz is readily removable.

Re: claim 4, to employ a conventional connector such as taught in fig. 4 of Williams would have constituted an obvious expedient shown used in an identical art device.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lagomarsino in view of Williams as set forth in the previous action in the rejection of claim 4. This claim stripped of offending matter of claim 5 would have been rejectable as set forth for claim 4.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Glintz or Lagomarsino as applied supra in view of Waterlyn as applied supra in further view of Rhines.

To employ a water source such as taught in Fig. 1 of Rhines would have been obvious to the ordinary artisan as same is shown in an identical art device.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3 and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support for the amended substance of this claim, which is contrary to "support surface" of the preamble of claim 1.

The added matter to the middle paragraph of page 6 is objected to as constituting new matter. No support is found in the original disclosure for this substance.

Claims 5 and 10-19 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5/11/04.

Claim 5 now calls for connection to a sink.

The drawing changes are approved.

Any inquiry concerning this communication should be directed to Charles Philips at telephone number 308-1515.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
